Introduction

Many audit organizations have looked to the microcomputer as a new audit tool, one that can be used not only by IS auditors, but by all auditors. This book highlights the benefits of Computer-Assisted Audit Tools and Techniques (CAATTs) and outlines a methodology for developing and using CAATTs in audit organizations. Today's auditors must become better trained, with new skills and areas of expertise to be more useful and productive. Increasingly, auditors will be asked to use computer-assisted techniques to audit electronic transactions and application controls. Legislation such as the U.S. Sarbanes-Oxley Act of 2002 encourages audit departments to find new ways to connect specialized tools into complex business systems (Baker [2005]). By harnessing the power of the computer, auditors can enhance their ability to critically review data and information and manage their own activities more rationally. Because of the critical shortage of these skills and talents, they will become more valuable and marketable. CAATTs are defined as computer-based tools and techniques that enable auditors to increase their personal productivity as well as the audit function. CAATT can significantly improve the effectiveness and efficiency of an audit during the planning, execution, reporting, and follow-up phases of an audit, as well as improve the overall management of the audit function. In many cases, the use of computers can enable auditors to perform tasks that would be impossible or extremely time-consuming to perform manually. Computers are ideal tools for sorting, matching, and performing various types of tests and mathematical calculations on data. Automated tools can also eliminate the limitations of following a rigid manual audit program as a series of steps to be performed. CAATT allows auditors to interactively investigate data and information and to react immediately to findings by modifying and improving the initial audit approach.

List of Contents

Introduction.....	i
List of Contents.....	ii
CHAPTER 1 General Overview of Auditing and Its development.....	1
A. Introduction Auditing.....	1
B. Audit Development.....	3
C. Internal Audit.....	6
D. Functions and Objectives of Internal Audit.....	9
E. Independent AuditInternal (IAD).....	13
F. Internal Audit Report.....	15
G. Information Systems Audit.....	18
H. Information Systems Audit Objectives.....	19
I. Computers Audit Software (CAS) or Generalized Audit Software (GAS) ...	20
J. Basic steps of IS Audit.....	21
K. Stages of Information Systems Audit.....	23
L. Various Other Types of Audits and Professional Organizations.....	25
CHAPTER 2 Risks in Technological Development.....	27
A. Risk Introduction.....	27
B. Audit Risk Components.....	31
C. Relationship between Audit Risk and Audit Evidence.....	32
D. Materiality.....	34
E. Types of Risk.....	35
CHAPTER 3 Internal Control System.....	41
A. The Importance of an Internal Control System.....	41
B. Internal Control Functions and Components.....	45
C. Limitations of Internal Control.....	46

D. Interested party	49
E. Internal Control System Objectives	50
F. Basic Principles of SystemsInternal control	51
G. Activities in Control Systems Internal	52
CHAPTER 4 Information System Audit Code of Ethics	57
A. Audit Code of Ethics	57
B. Auditing Standards	59
C. ISACA Auditing Standards	62
CHAPTER 5 Information System Audit Standards	83
A. Auditing Standards	83
B. Physical Audit Needs	84
C. IT Governance	87
CHAPTER 6 Information Systems Audit Procedures	89
A. Information Systems Audit.....	89
B. Types Information Systems Audit	90
C. Information Systems Audit Objectives	91
D. Risk Measurement Procedures.....	93
E. Risk Control System.....	94
F. Risk Based Audit.....	95
G. Computer Assisted Audit Techniques (CAAT) Tools for testing controls....	97
H. Control Effectiveness	99
CHAPTER 7 Structure, Process, and of IT Governance.....	101
A. Information Technology Governance Structure.....	102
CHAPTER 8 Information Technology Governance Strategies and Techniques	111
A. Determinants of Information Technology Governance.....	111
B. IT Governance Strategy for Business	112
CHAPTER 9 The Value of Information Technology	125
A. Information Systems Audit Approach	125
B. Understanding the Concept of Information Systems Audit.....	129

C. System Audit StagesInformation	131
CHAPTER 10 Information Technology Governance	135
A. The Importance of Information Technology Governance	135
B. Understanding TataManage Information Technology	136
C. Information Technology Governance Responsibilities	139
D. Information Technology Governance Framework	139
E. Tata BenefitsManage Information Technology	140
F. Information Technology Governance Model	140
CHAPTER 11 Implementation of Information Technology Governance	147
A. Implementation of IT Governance	147
B. ComparisonImplementation of IT Governance	157
CHAPTER 12 IT Balanced Scorecard Framework	161
A. Balanced Scorecard	161
B. Factors Inhibiting the Balanced Scorecard	162
C. SuperiorityBalanced Scorecard	163
D. Spurring FactorsImplementation of the Balanced Scorecard	164
E. IT Perspective Balanced Scorecard	165
